

# Gr. 3 Species at Risk

1. An animal's *habitat* includes the four things that it needs to survive. What four things do all animals need?

\_\_\_\_\_

\_\_\_\_\_

2. Draw arrows to match the animals to their habitats:

Grizzly Bear

Wetlands

Northern Leopard Frog

Grasslands

Burrowing Owl

Mountains

3. What is a life cycle? Explain the term and give an example.

---

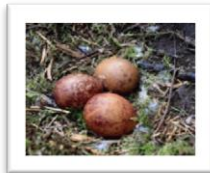

---

---

4. Organize the peregrine falcon's lifecycle by writing the number 1, 2, 3 or 4 below each picture.

\_\_\_\_\_

5. What did DDT do to the peregrine falcon's life cycle?

---

---

**6. What does extinct mean?**

- a. The animal lived a lot time ago
- b. The animal died
- c. The entire species is dead
- d. The animal is in trouble

**7. What does it mean to be a species at risk?**

- a. The species is extinct
- b. The animal can't reproduce (have babies)
- c. The animal is not in trouble
- d. The species is in trouble and may soon become extinct

**8. What are three things that are harming Alberta's animals and putting them at risk for extinction?**

---

---

---

**9. What are three things that YOU can do to help Alberta's species at risk?**

---

---

---

Thank you for being a champion of Alberta's species at risk!
