Appendix E – Pandemic Participant Information Sheet

The overall principle guiding CPAWS Southern Alberta’s actions and decisions is to take reasonable steps to protect the safety, health, and well-being of our staff and program participants at any time that a public health emergency due to an infectious disease is called by the WHO or any applicable government body for our geographic region. We will use reasonable efforts to follow the guidelines and orders of the Government of Alberta based on the public advice of the province’s Chief Medical Officer, but we cannot guarantee that orders and recommendations will be followed at all times by CPAWS Southern Alberta staff or by Activity participants.

Minimum Requirements

The following minimum standards must be observed at all times by staff and program participants:

- Complete daily health screening in a form approved by Alberta Health Services and do not participate if show symptoms associated with the infectious disease, have tested positive for the infectious disease, or are subject to any isolation or quarantine requirements.
- Wash hands frequently with soap and water or sanitize hands with 60%+ alcohol-based hand sanitizer for at least 20 seconds.
- Avoid close contact with people who have symptoms associated with the infectious disease.
- Wear a face covering without an exhalation valve (medical or non-medical) where required by law or regulation. Face coverings must be worn in such a way that mouth and nose remain covered at all times.
- Adhere to any physical distancing requirements.
- Practice respiratory etiquette including coughing and sneezing into bent elbow.
- Do not share food.
- Follow CPAWS Southern Alberta and participating organization’s rapid response plans.

Participant Responsibilities

Your role as a participant is very important to keep everyone safe. You must commit to the following responsibilities:

- Meet all the Minimum Requirements listed above.
- Conduct and pass a health screen in a form approved by Alberta Health Services for yourself and your children (if applicable) before coming to the program.
- Do not come to the program with symptoms associated with the infectious disease.
- Be familiar with and follow the CPAWS Southern Alberta rapid response plan.
- Maintain physical distancing as required.
- Practice respiratory etiquette (e.g., coughing or sneezing into a bent elbow, promptly disposing of used tissues in a personal garbage bag in your/your child’s backpack – or, if possible, a lined garbage bin).
  - Bring a plastic bag to collect your/your child’s tissues – preferably one that seals
- Follow instructions from the Facilitators in Charge and CPAWS Southern Alberta staff, maintain physical distancing (as appropriate) and do not share food.
CPAWS Southern Alberta Staff Responsibilities

In addition to the Minimum Requirements listed above, CPAWS Southern Alberta is taking the following measures to help keep you and your students/clients safe. CPAWS Southern Alberta staff will:

- Maintain a physical distance of 2 metres from the group as much as possible, when applicable.
- Wear a non-medical face covering during the program and follow proper use of face coverings if required by law or regulation.
- Encourage the following for staff and program participants:
  - thorough and frequent hand washing and/or utilization of hand sanitizer with a minimum of 60% alcohol
  - respiratory etiquette
- Utilize physically distant activities during the program as much as possible, if applicable.
- Eliminate or reduce shared materials as much as possible.
- Clean and disinfect shared materials between programs in accordance with current guidelines.
- Comply with Alberta Health contact tracing recommendations.

Rapid Response Plan

The steps to be taken if someone develops symptoms associated with the infectious disease during a program include:

- Isolate the individual from the group in a separate room (indoors) or at least 2m away (outdoors).
- End the program immediately and arrange to get participants back safely.
  - If CPAWS Southern Alberta staff develop symptoms, FIC takes control of the group and arranges for the group to get home / back to school as soon as possible.
  - If FIC develops symptoms, they remove themselves from the group and follow their school board/organization protocols. The school board/organization must have another staff member take control of the group and arrange for the group to get home / back to school as soon as possible.
- If staff need to be in close contact with or administer first aid to someone, staff will be mindful of handwashing/hand sanitizing, wear gloves and a face covering, and avoid contact with respiratory secretions.
- Staff/FIC isolate and sanitize all items used by the individual as soon as possible.
- Isolate items that cannot be cleaned and disinfected for a period of at least 3 days.

Non-compliance

In the event of a participant not complying with our risk mitigation procedures, staff will play a secondary role and let the FIC be the first to respond to a situation within their group.

- FIC decides if the participant will continue on the program or if they will need to leave. In the latter case, FIC will contact parent for immediate pick-up.
- Staff will assist as necessary.
- If participants are in danger and there is a threat to the group (such as increased risk of infectious disease transmission), staff must move the group to a safer location until the situation is resolved.
- CPAWS will reassure the group and provide alternate activities as necessary.
- If the non-compliance behaviour continues, staff will end the program early.
