How to take part in

Instructions: Search for the QR codes. Scan the codes using the iPads and record your sightings below!

Example:

QR code number: 1	Name of species: Magpie Hint: check the identification guides if you need help with this!
Location: Inglewood bird sanctuary, Calgary	Time: 10:30 am Date: May 22
Habitat: nesting in cherry bushes	Number of individuals: 1
This species is a: producer / consumer / decomposer This species is a consumer. They eat insects and carrion. How would the ecosystem be impacted if this species was removed? Magpies eat large numbers of insects, so insect populations may not be kept under control if magpies were removed from this ecosystem.	
Notes: Magpie was sitting in the nest, may be sitting on eggs	

QR code number: 1	Name of species: Hint: check the identification guides if you need help with this!
Location:	Time: Date:
Habitat:	Number of individuals:
This species is a: producer / consumer / decomposer How would the ecosystem be impacted if this species was removed?	
Notes:
